Petunjuk Pengerjaan

Ujian berbasis project dan bukti

- Jawaban wajib berasal dari project praktikum mahasiswa sendiri, bukan sekadar hafalan atau jawaban umum.
- Setiap nomor harus memiliki bukti screenshot yang relevan. Screenshot boleh berasal dari browser, View Source, DevTools, VS Code, atau hasil test project.
- Screenshot harus memperlihatkan konteks: nama file/tab atau URL dan area output/kode yang menjadi bukti. **Crop yang terlalu sempit tanpa konteks tidak dinilai sebagai bukti kuat terindikasi dari hasil teman kelas.**
- Buat folder evidence/uts/ untuk menyimpan file soal beserta jawabannya dalam bentuk pdf.
- Satu screenshot boleh dipakai untuk maksimal dua nomor jika benar-benar membuktikan kedua jawaban; tetap tulis nama file bukti pada masing-masing jawaban.
- Jika mahasiswa memodifikasi konten yang memang diizinkan panduan, jawaban dapat berbeda dari contoh dosen selama logika, hasil hitung, dan screenshot project konsisten.
- Pilih jawaban dengan highlight kuning.

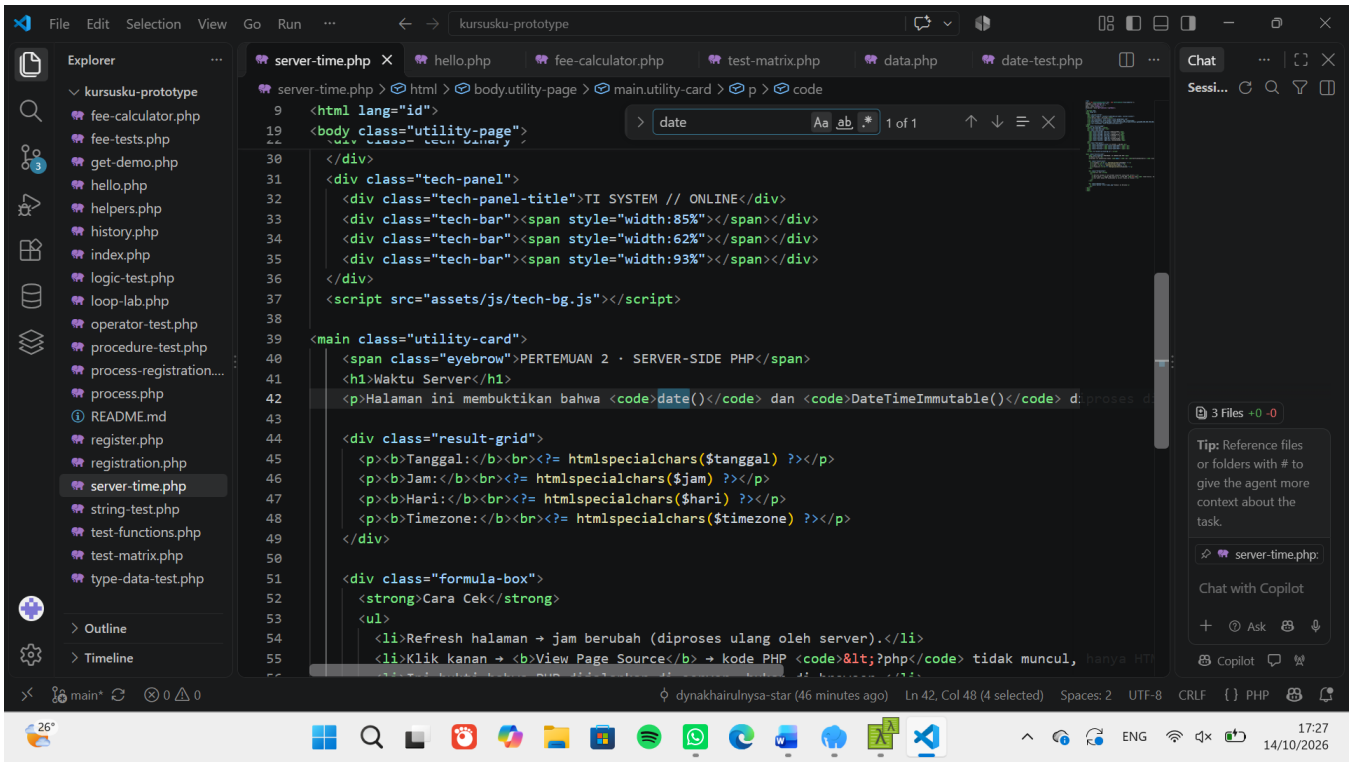

A. Pilihan Ganda (Nomor 1-20)

Pilih satu jawaban yang paling tepat. Setelah jawaban huruf, tulis nama file bukti screenshot yang Anda lampirkan.
